Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

the claimed invention is related to a method for separating and recovering speech signal from a signal that has the combination of speech and noise component.

more particularly according to the invention, the composite signal which are received from two sound sources are first separated into noise components and speech components having residual noise and next the speech components are further processed to remove the residual noise in order to produce clean speech. The claims are allowed because the prior arts of record alone or in combination do not teach the claimed process of applying detection judgment criteria on the noise separated component based on a predetermined threshold value to detect a speech segment and a noise segment and extracting components falling in the speech segment to generate a recovered spectrum group of the target speech signal as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Abebe whose telephone number is 571-272-7615. The examiner can normally be reached on monday-friday.
